 Portfolio

Education

Bachelor's degree Computer Engineering

Lviv Polytechnic National University
09/2023 – Present | Lviv, Ukraine

Skills

- Python Programming
- Backend Development
- FastAPI / Django / Flask
- Relational Databases (SQL)
- Docker & Containerization
- Linux Administration
- Git & Version Control
- CI/CD & Cloud Basics
- System Automation & AI Integrations

Languages

Ukrainian
Native

English
Upper-intermediate

Summary

Computer Engineering student at Lviv Polytechnic with hands-on experience in **full-lifecycle software development — from initial project concept and system architecture to cloud deployment and delivery**. Proficient in Python backend engineering, asynchronous systems, REST APIs, PostgreSQL, and Docker containerization. Focused on automating workflows, writing scalable code, and delivering production-ready solutions.

Professional Experience

Self-Employed

Python Backend Developer

11/2025 – Present | Lviv, Ukraine

- Built async Python backends and bots using FastAPI, aiogram, and Asyncio.
- Managed PostgreSQL databases with async SQLAlchemy ORM and Alembic migrations.
- Integrated AI & REST APIs with automated background execution and rotation mechanisms.
- Deployed containerized environments via Docker, Docker Compose, and GCP (Debian Linux).
- Wrote comprehensive unit and integration tests with Pytest to guarantee API stability.

Certificates

- Python Fundamentals — SoftServe Academy
- Advanced Python with Django — SoftServe Academy
- DevOps for Developers — SoftServe Academy
- Database Fundamentals — SoftServe Academy
- Modern Frontend Fundamentals with AI — SoftServe Academy
